Surveying Equipments

Auto Level (Topcon) SL-SL-001

The Topcon AT-B series sets a new standard for auto levels used in surveying, engineering and construction applications. The AT-B4 automatic level features further enhanced reliability under all environmental conditions. With the IPx6 rating, the instrument is protected against powerful water jets from all directions, making it fully resistant to driving rain and splashing water. The Topcon AT-B4 quickly levels and stabilizes the line of sight with its finely tuned magnetic damping system, in spite of any fine vibrations present when working near heavy equipment or busy highways.

Features: 24X magnification, WATERPROOF to IPx6 rating, short focus (1.6 ft. min.) magnetic damping, 360-Degree Horizontal Circle, Sighting Guide, 1:100 Stadia, Approximate Range-250 feet, 5 Year Manufacturers Warranty.

Package includes: Auto Level, Hard-Shell Carry Case, Plumb Bob, Weather Protective Bag, Lens cleaning cloth, Allen Wrench, and Operators Manual.

Topcon AT-B Series Features:

- Durable, Dependable, High Value Auto Levels
- 3 Models – 32x, 28x, and 24x Magnification
- Rapid, Accurate, and Stable Automatic Compensation
- Ultra-Short 20cm (7.9 in.) Focusing
- All-Weather Dependability
- Clampless, Endless Fine Horizontal Adjustments

Rapid, Stable, and Durable Compensation

The compensator of AT-B Series incorporates four suspension wires made of super-high-tensile metal that features minimal thermal expansion coefficient, providing unmatched durability and accuracy. Finely tuned magnetic damping system quickly levels and stabilizes the line of sight despite the fine vibrations present when working near heavy equipment or busy highways.

Horizontal Circle for Angle Measurement

Horizontal angles can be directly read in 1° or 1gon units. Free rotation feature allows you to read any angle from zero. The circle is covered for protection against dirt and scratch. The resultant window is located below the eyepiece for quick reading.

20cm (7.9 in.) - Ultra-Short Minimum Focus

The AT-B Series can focus on objects at 20cm (7.9 in.) in front of the telescope. This feature dramatically facilitates the works in confined spaces.

Auto Level (Sokkia) SL-SI-002

SL-SI-002

Sokkia's B series automatic levels feature enhanced reliability under all environmental conditions and are more tightly sealed against water, dust and humidity (IPx6). Quick setup, easy sighting and superior durability against vibration and shock ensure increased productivity. The B series Sokkia Auto levels incorporate the most precise and reliable compensation available in the market today. The optimally designed telescope provides exceptionally bright and sharp view that reduces operator's eye strain. Quick collimation and horizontal angle measurement combine for fast and easy aiming of layout and alignment tasks.

The market- and time-proven B series automatic levels provide outstanding precision for a multitude of leveling tasks.

- Precise, Reliable Automatic Compensation
- Superior Telescope
- Quick Collimation
- Horizontal Angle Measurement
- Stadia lines on the reticle allow distance measurements
- Rapid, Easy Setup
- Easy to Adjust

Surveying Equipments

SL-SE-004

Dumpy Level SL-SE-004

Special Features:

- Internal Focusing fitted with horizontal circle
- Sensitive bubble is mounted on the side of the telescope
- Strong
- Compact
- Light in weight
- First optical quality
- Excellent folding mirror
- Observer can read the bubble with ease

Designed For:

Precise and reliable operation in all types of surveying locations.

SL-SE-005

Vernier Theodolite SL-SE-005

Unique Features:

- Quality telescope
- High contrast optical system fitted with coated objectives
- Cylindrical Steel frame metal axis extra long for stability
- Erect image for comfort and friendliness
- Excellent portability

Ideal To Be Used In:

- Engineering surveys
- Construction projects
- General layout work
- Cadastral work
- Traversing triangulation
- Mining

SL-SE-006

Topcon DT-200 Series Digital Theodolite SL-SE-006

The Topcon DT-200 series integrates the same high-quality advanced absolute circle reading technology found in Topcon's high-performance total station products for more accurate field calculations; and they continue to deliver the highest quality optics and electronics you expect to find in Topcon theodolites.

Topcon DT-200 Series Features:

Long Battery Life

Waterproof and Dustproof Digital Theodolites

Available in three affordable models delivering 5", 7", or 9" angle accuracy, there is a DT-200 theodolite perfect for any job. Like the DT-100 series, the DT-200 series withstands any wet or dust conditions in the field, allowing for a more productive day during inclement weather. All models are also compact and lightweight for easy portability; and their simple operation provides precise measurement in a functional, hands-free package.

Longer battery powering duration

Longer battery powering durations using alkaline batteries. Continuous angle measurement for 150 hours. Laser continuous angle measurement for 45 hours.

Surveying Equipments

Absolute encoder is used

Detection of 0° position is no longer needed. Stable, high-accuracy measurement.

Laser pointer

The laser pointer is injected in collimation direction by simply operating one switch. Workers can perform work without guidance by observing personnel.

Excellent waterproof structure

The theodolite body is guarded against a sudden torrential rain and dirt. The theodolite can be used reliably at work sites under severe conditions.

Topcon Gowin Total Station TKS-202 SL-SE-008

SL-SE-008

Fine Quality, Only From Gowin

Leveraging on Topcon's optimal manufacturing excellences, GOWIN ensured every single production process of the TKS-202 Total Station is in compliance with international standards and went through stringent quality control.

From fully-automated ELM trials, to 48 hours of non-stop extreme environment conditioning testing, GOWIN Total Station demonstrated its durability and operational superiority, highlighting GOWIN commitment to constantly improve.

The Topcon Gowin Total Station TKS-202 is ideally suited for all jobs requiring the accuracy and versatility of a high-quality total station. Its ease of use makes it ideal for construction jobs like layout. Its 2-second accuracy makes it perfect for the most demanding surveying and measuring tasks. Its low price makes it the right choice for every budget.

The Topcon Gowin Total Station TKS-202 provides an accurate, low cost measuring solution featuring:

- 2" angle accuracy provides 1/16th of an inch accuracy at 1,000ft.
- Dual keyboards with and expanded numeric keypad for faster data input.
- Accurately measure up to 2,000m with a single prism.
- Internal data storage for up to 24,000 points.
- Single axis compensation with ±3° compensating range.
- IP54 environmental protection rating.

With a full alpha-numeric keypad and onboard memory that will hold up to 24,000 points, a 14-hour Li-ion battery life, and an IP54 environmental rating, the Topcon Gowin Total Station TKS-202 is a full-featured instrument designed to meet the most rugged demands.

Onboard software includes functions such as road, moving line measurement and resection. For added efficiency, it is compatible with all current Topcon® and Sokkia® field controllers with a GTS series conventional total station driver installed.

Why work with out-dated instruments? The new Topcon Gowin Total Station TKS-202 lets you economically add the versatility and efficiency of a high-quality total station for all your layout, measuring, and surveying jobs.

Topcon's new ES 100 Series Total Stations-New Advanced Design with Superior Technology SL-SE-009

The ET series electronic theodolite integrates the same high-quality advanced absolute circle reading technology found in South's high-performance total station products for more accurate field calculations; and they continue to deliver the highest quality optics and electronics you expect to find in South theodolites. The new ES Series was designed from the ground up to deliver the very latest technology advantages, all in a small, sleek design - you'll appreciate the advantages from the very first measurement.

Featuring a class leading EDM unit, the ES is able to measure up to 4,000m to standard prisms, and can measure in reflectorless mode up to 500m in an incredible 3mm + 2ppm accuracy.

Measurements are carried out faster than ever, and at 15mm (over 30m), the bright red laser dot pinpoints fixtures with ease.

Ultra-Powerful, Advanced EDM

- 500 m non-prism range
- 4000 m prism range
- Less than 1 second line measurement

Longlink

The exclusive LongLink™ communications functionality in every ES Series model provides operational capabilities never before offered in a manual total stations. With a 300m range wireless communication using Bluetooth Class 1 technology, you can now operate the data collector from the "smart-spot" of the crew, the prism pole. Also referred to the two-man, economical robot solution, Topcon's new LongLink™ technology brings a whole new level of flexibility to your manual field crew.

Advanced Angle Encoder System

- "Best in Class" 1" angle accuracy available
- Incorporates exclusive IACS (Intelligent Automatic Calibration System) on 1" & 2" models

SI-SL-009

Surveying Equipments

Ultimate in Rechargeable operation – 36 Hours!

Up to 36 hours of operation on a single charge.*¹

Eliminates the need for nightly recharging and carrying extra batteries.

Work with confidence all day without the worry of dead batteries.

Rugged, Waterproof Design

Waterproof/Dustproof IP66 design handles the toughest environments.

Magnesium-alloy housing providing stable angle accuracy. Completely

Easy Access USB 2.0 Memory

Up to 8MB storage

Environmentally protected

Compatible with industry standard accessories and cables

Planimeter In Box

Digital Planimeter SL-SI-011

Planimeter Digital Planimeter KP-90N Series with the most advanced functions and perfect reliability. The most standard model of "Kitsuumi Placom" N-Series has made the excitingly highest attainment in the history of Placom Digital Planimeter KP-90% ever made. Measuring capacity is remarkably enlarged. Measuring by 6-digit pulse count enables to measure 100 times larger accumulative area than ordinary planimeters. Easy calculations of Cumulative and Average Value Measurement.
