

SILVER SCHMIDT TEST HAMMER

MAKE – LABTEK, ORIGIN – INDIA

EXTENDED RANGE OF APPLICATIONS

1. Conversion curves are provided for a wide range of compressive concrete strength, including low and high strength concrete $f_c < 10 \text{ N/mm}^2$ (1.450 psi) and up to 170 N/mm^2 (24.650 psi).
2. Conversion curves for different types of modern concrete are preset in the Silver Schmidt, based on tests performed by an independent institution.
