

TIG WELDING MACHINE 250AMP

MODEL NO – SL-MEL-11, MAKE – LABTEK, ORIGIN – INDIA

AC/DC TIG Welding Machine thyristor control or Electronic control. Especially designed for TIG welding, having gas shield control and water cooling in welding gun, fitted with solid rubber wheels which conveniently move and safety. Complete with welding accessories. **Technical Specification:**

- 01). Maximum welding current not less than 250 Amp.
- 02). Minimum duty cycle 40% at 250 Amp.
- 03). Electricity supply AC 220/380 Volt 50 Hz.
- 04). Open circuit voltage minimum 70 Volt.
- 05). Consist of power factor correction.
